lent of only 371% grains for every dollar paid you. Can you afford it?

A GREAT RISK. "But they will tell you that these new dollars, containing 37114 grains, will be as valuable then as 800 grains are now. They will tell you that a dollar is a dollar, and that free coinage will bring the value of the bullion up to its coinage value. So that then 37114 grains will be worth a dollar. Three hundred and seventy-one and onefourth grains of silver bullion will be indeed worth one of the new silver dollars, because with that number of grains you can get one of the new dollars, and one of the new dollars will be worth 37114 grains of silver, because there are just 37114 grains in it: but the question-the question in which you are interested-is this: What will be the value of that dollar when paid to me in wages, compared with the dollar in which I am now paid. You know the First district of Indiana. Two splendid value of your present dollars. I want to speak a moment of the banker's position. I want to show you, as I readily can, that the banker, if he had regard only for an immediate and ill-gotten profit, would himself advocate the free coinage measure of the Democrats. Let's see how he could make it serve his profit. 'Assuming that the free coinage law

would be operative in two years. Knowing this, the banker, having, say, \$500,000 in deposits, could buy at the present market price, say, one million Mexican dollars, or an amount of silver equal thereto in bullien, each one a little heavier and a little finer than the proposed silver dollars. The mint being opened, he could take his one million Mexicans to the mint and receive in return one million and eighteen thousand of the new American dollars. With these in hand, and they being legal tender, he could pay off his deposits with 500,000 of the coins and keep 518,000 of them as the reward of his shrewdness. His real profit would not be \$518,000. They would be cheap dollars, and compared with gold dollars, would possess but half their purchasing power, so we must divide the \$518,000 by 2 which gives him a net gold profit of \$257,000 on the transaction. You will ask, then, why with such possibilities before them, the bankers oppose the measure. I will tell matter must foresee, that with the adoption of the measure gold would disappear banks, now largely in gold, would be drawn out; they would be forced to contract their loans; a general and exhausting liquidation would take place; merchants and manuface turers would fail, and in the general wreck and ruin the banker would not escape. But do not flatter yourselves that you would exempt from the general disaster. Shops and factories would be closed; a sharp halt would be called on all enterprises; labor would go into idleness; wages would be reduced and general misery realized. There would be a resurrection, no doubt. Our country is too great, its resources too manifold, to long remain in bankruptcy and idleness. With the old wrecks cleared away, we would begin again. The new silver money would be the standard and the common medium of exchange, and, after inconceivable disaster, we would have the chronic condition of a fluctuating currency now enjoyed in our neighboring re-

Two Natives of the States Who Have Made Fortunes in Chile.

Ainslee's Magazine.

Don Pedro McKellar is a North American Chileno of Scotch descent. Thirty odd years ago he was a pay clerk in the old navy of Uncle Sam. His ship was stationed on the South Pacific station, and he saw an opportunity at Valparaiso. His resignation followed, and to-day the entire tugboat system of Valparaiso's harbor is owned by this former naval accountant. From one single tug his business has increased until it now comprises a whole fleet, every craft of which is busy adding to the already large fortune of Don Pedro. He has dabbled successfully in politics. He also married an estimable Chilean lady. and his sons are now recognized among the most valued supporters of the present gov-

In Chile's financial world there is one successful American. This is Mr. Benamin F. Bernstein, of Santiago de Chile en years ago Mr. Bernstein left New York for South America. His success has been henomenal, as the Chilenos do not take indly to American financiers. He saw that to carry out his plans it would be necessary to adopt at least temporarily the methods of the country, overthrowing every precept of his education in money matters. Not only did he succeed in this respect, but he has gradually shown some of the brightest men in Santiago the mistakes they were making, and they have ladly enough profited by his suggestions. Mr. Bernstein is the youngest of the wealthy Americans in South America. His personal fortune equals a million pesos, not to mention the fortune of his wife, who came of the famous Cousino family, the richest in all Chile.

of Mr. Bernstein's successes has been the handling of the affairs pertaining to an uncle's estate, which involved extensive dealings with the Chilean government. These the young New Yorker has unraveled with much profit to all interested

REVOLT IS SPREADING.

More Than One Hundred Muncie Democrats Oppose Bryan.

Special to the Indianapolis Journal. MUNCIE, Ind., Oct. 25 .- The Bryan followers in this city were never so worried as they are now and are laboring hard to impress their party throughout the State that Capt. W. J. Hilligoss, and those nineteen Democrats who invited him to address them on present issues and conditions, are Republicans. In this they protest entirely too much. These leaders selected the captain four years ago as one of the delegates to the State convention from this county and at the district meeting of the delegates, on the night before the State convention, he was chosen as the district committeeman on organization and by that committee made chairman and reported the rules of procedure and organization transparencies. them, however, refused to indorse the

Chicago platform, and voted for Palmer or McKinley, while seven out of the nineteen voted for Bryan. The result of the open stand taken against Mr. Bryan and the Kansas City platform has developed the fact that many others scattered over the city and through. out the county are daily declaring that they cannot support Bryan. One of these, a farmer, said to-day: "The farmers have not experienced such favorable conditions for a great many years and there is a very general impression among those with whom I have talked, that the radical changes proposed by Mr. Bryan, would be disas

the present conditions rather than take such chances as Bryanism presents. The situation was never brighter for the success of the Republican ticket than now in Delaware county. The Democrats who called the meeting addressed by Captain Hilligoss are earnestly at work and have the names of more than one hundred of their party associates who will not vote for Bryan. One of these Democrats said: "We find especial encouragement among the Democratic farmers and men who are studying the situation. Convictions with them stand above party ties and in this campaign they find it is no sacrifice of true Democracy to refuse to support the Popu-

Soldier at Manila Holds Him Responsible for the War.

Special to the Indianapolis Journal. NOBLESVILLE, Ind., Oct. 25.-The Ledger is in receipt of a letter from Private Frank Tucker, son of Dr. A. R. Tucker, of this city, who is now stationed at Manila. He is a member of the Twentieth United States Infantry and has been in the Philippines for a year. He speaks in the highest terms of the value of the Philippines and says the war would have been over had it

not been for the agitator, Bryan. Follow-

ing are extracts from his letter: "I do not believe there is a more productive spot on the globe than right here and I think the people of the United States are very foolish to ever think of giving the islands up. Manila is one of the greatest seaport cities on this side of the world, for every country does business here, and I cannot help but think that these islands are one of the biggest pieces of raw material that any nation ever put their hands on All we need here are a few railroads and some enterprising Americans to open up

the country. "Over here \$1 of American money worth \$2 of Mexican money. For a \$10 gold coin we get \$20 in silver. If Bryan wants free coinage of silver send him over here and I think he will get tired of it. If the laboring man knows a good thing he had better let well enough alone, for I know selling from twenty cents to one dollar a applauded. pound in American money, or from forty cents to two dollars in Mexican money. Blackford County.

Special to the Indianapolis Journal. HARTFORD CITY, Ind., Oct. 25 .- Senator Tillman, of South Carolina, spoke at a Democratic meeting here last night There was a large attendance, but the senator's language was so vile that the women in the audience were compelled to leave. His attack on Senator Hanna was absolutely unfit for publication, while his abuse of farmers was such as to antagonize every | present. agricultural worker present. He upheld lynch law in the South and declared, in regard to money, that if free silver had been left out of the platform he would have

bolted the ticket. J. A. Hindman, a prominent local Democrat said this morning that the Republicans here should pay the expense of getting Tillman here, as he surely made Republican votes. Elisha Pierce, who introduced him, said that he felt like kicking him off the platform. Another Democrat said today: "That kind of a speech may be all right south of the Mason and Dixon line, but it won't make votes in Indiana.'
